AMENDMENTS TO THE CLAIMS

WZ 12/19/2007

This listing of claims will replace all prior versions and listings of claims in the application:

LISTING OF CLAIMS:

1. (currently amended): A process for producing a cold-rolled ferritic/martensitic dualphase steel strip, wherein a slab, the chemical composition of which comprises, by weight:

 $0.010\% \le C \le 100\%$

 $0.050\% \le Mn \le 1.0\%$

 $0.010\% \le Cr \le 1.0\%$

 $0.010\% \le \text{Si} \le 0.50\%$

 $0.001\% \le P \le 0.20\%$

 $0.010\% \le AI \le 0.10\%$

 $N \le 0.010\%$

the balance being iron and impurities resulting from the smelting, is hot rolled, said process then comprising:

- coiling the hot-rolled strip obtained at a temperature of between 550 and 850°C; then
 - cold rolling the strip with a reduction ratio of between 60 and 90%; then
 - annealing the strip continuously in the intercritical range; and
- cooling it down to the ambient temperature in one or more steps, the cooling rate between 600°C and the ambient temperature being between 100°C/s and 1500°C/s; and
 - optionally tempering it at a temperature below 300°Cless than 250°C,

the annealing and cooling operations being carried out in such a way that the strip finally contains from 1 to 15% martensite.
